

Supporting the prevention  
of addiction in Georgia

FUNDACJA PRAESTERNO

# Supporting the prevention of addiction in Georgia at the local level

Tbilisi, 5-7 June 2017

Ministerstwo Zdrowia

*Public task co-financed by the Solving Fund Gambling Problems  
at the disposal of the Minister of Health*

Krajowe Biuro do Spraw  
Przeciwdziałania Narkomanii

The aim of the project is to increase professional competencies of 40 people from the target group of the project – addiction specialists and/or local government employees from Georgia – in terms of planning, design and implementation of local preventive programmes.

**We need the characteristics of these two groups**

**We need a description of the training needs of these two groups**

**What will be the proportions between these 2 groups in our training?**

Recommendations developed during the implementation of the programme will be described in the handbook and will serve as a basis for design and development of preventive programmes adjusted to specific local conditions of the beneficiaries of the project.

**It seems that the manual will be a permanent achievement of the program and will be widely available.**

**We should set the subject of this publication as a table of contents.**

## Programme seminar – study visit in Georgia; 5-7 June

The main aim:

Development of the detailed program.

Joint work during  
the seminar of the  
Polish and the  
Georgian teams

Describing by the  
Polish team the  
achievements of  
the programme  
seminar

Written remarks  
on a detailed  
programme  
developed by the  
Georgian team

Development of  
the final version  
of the programme  
by Polish team

Creating, launching and maintaining websites devoted to the programme: Polish  
and Georgian version

## Recruiting participants – till the end of August

**The recruitment regulations must be developed and delivered to the Praesterno Foundation.**

**How will the participants be selected, if there will be more than 40 candidates? According to what criteria?**

**Will there be any recruitment material needed?**

## Training in Georgia

Session 1  
September 4-6

Session 2  
early October

Session 3  
November

**What will be the role of Georgian experts during the training?**

## Study visits in Poland

### First Study visit – October . About 20 participants

Participation in an international conference in Warsaw organized by the National Bureau for Drug Prevention (2 days) - monitoring of a drug prevention programme at the local level; quality in prevention; new psychoactive substances

Participation in the seminar only for the Georgian group (1 day) - the problem of preventive local activities.

### Second Study visit – November. About 20 participants

Participation in an international conference in Warsaw organized by the Mazovian Center for Social Policy (2 days) - presentation of the EMCDDA report; counteracting new psychoactive substances; environmental prevention; harm reduction – programmes, implementation, financing

Participation in the seminar only for the Georgian group (1 day) - the problem of preventive local activities.

**According to what rules will the participants divide into groups?**

## Evaluation of the programme

An evaluation questionnaire completed by all participants at the end of the program

Interview with Georgian coordinator

Interview with GePolish coordinator

Interview with 5 participants

Interview with 5 trainers

Preparation of the evaluation report

**How will the interviewees (participants) be selected?**

## Development of recommendations and handbook

**We need to develop rules of cooperation between Polish and Georgian teams**

Supporting the prevention  
of addiction in Georgia
